

OP100/OC100 and OrthoID

**New panoramic cassette 15x30cm design implementation. From unit s/n
Ortho ID from s/n**

Type:

Information

Action required:

No

Urgency:Normal

Description:

Earlier it was possible that the cassette could be inserted backwards into the cassette tunnel. Now there has been added two pins asymmetric on the upper outside edge of the cassette and the tunnel ends have grooves so that the cassette can be inserted only in one correct way to the exposure position in the unit.

Cassette 15x30cm with pins

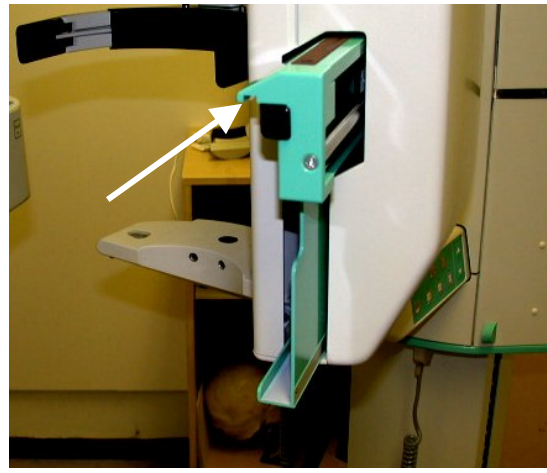

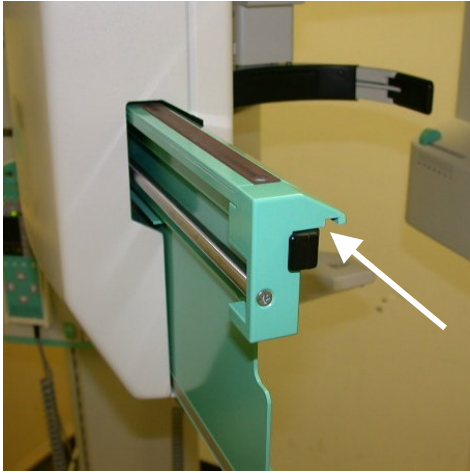

Cassette to the tunnel

The pins pass the grooves in the tunnel ends.

The grooves in the tunnel ends

The pins prevent the cassette sliding sideways out when cassette is pressed down for the marking procedure.

The change is not interchangeable:

This new construction can be upgraded to old units: Needed parts are cassette tunnel ends and the new cassette.

The old cassette without pins can be used with the new cassette tunnel ends but the new cassette with pins can not be used in old units with old cassette tunnel ends.

Exception:

When the pins will be replaced with standard screws code 9792, M3x4, DIN7985 or equivalent you can use the cassette with old units with old cassette tunnel ends.

New codes:

Cassette without pins

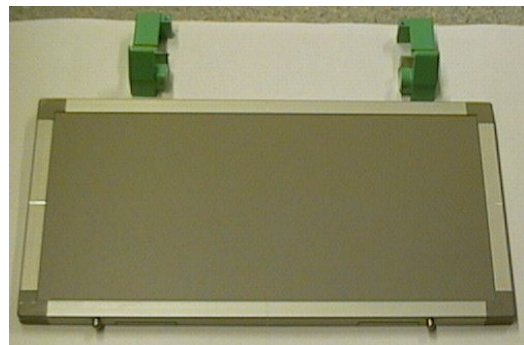

Cassette with pins

Type	Old cassette without pins	New cassette with pins
Window Cassette 15x30cm without screens	21663	65948
Window Cassette 15x30cm with Kodak Lanex Medium screens	65696	63693
Window Cassette 15x30cm with Kodak Lanex Regular screens	65695	63694
Window Cassette 15x30cm with Kodak Ektavision screens	65687	63695
Window Cassette 15x30cm with AGFA Regular screens	65699	63696

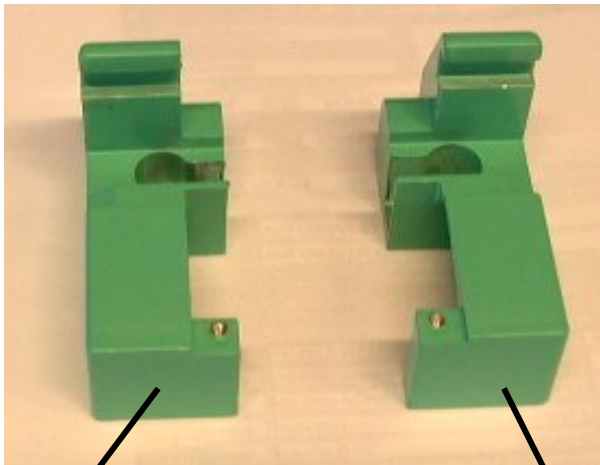

Upgrade kits:

Type	Kit code
Cassette with Kodak Lanex Medium screens with guides, kit	60761
Cassette with Kodak Lanex Regular screens with guides, kit	60762
Cassette with Kodak Ektavision screens with guides, kit	60763
Cassette without screens with guides, kit	60764

Upgrade procedure:

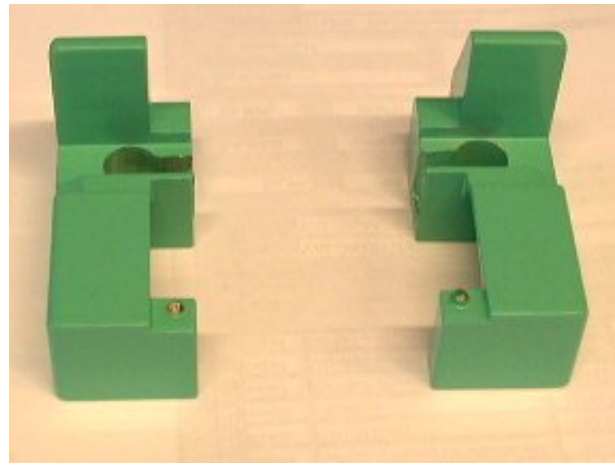

New tunnel ends

65677 Cassette
tunnel end left
side

65678 Cassette
tunnel end right
side

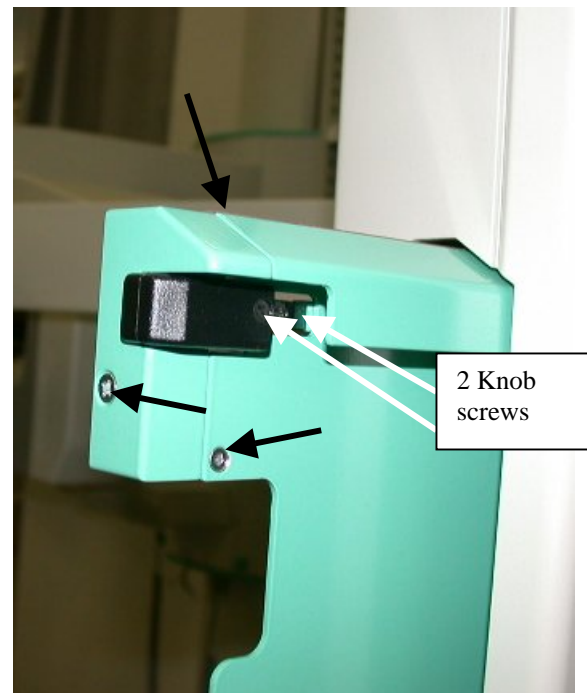

Old tunnel ends

Old and new cassette tunnel ends have the old codes because parts are interchangeable.

Replacing the tunnel ends:

Remove the 3 screws of Tunnel end.
Remove the 2 screws of the Knob
Replace the end part.
